# Estonian LEADER cooperation project Smart Villages development programme

- 13 LEADER LAGs (out of 26) with 24 villages are implementing a cooperation project on national training programme for Smart villages

Expected results of the programme are:

Each village/community drafts Smart Village strategy – 24 strategies

Each village/community implements pilot action in the frame of Smart Village strategy – 24 pilot actions

National Smart Villages Network will be established and linked with international Smart Rural 21 network

Communication activities to introduce Smart Village strategies and results of pilot actions will be implemented to enhance public awareness and the know-how of Estonian villages, governmental institutions, etc

LEADER LAGs will gain experience on how to implement the concept of Smart Villages at the local level and can, if necessary, plan follow-up activities into their LDS for the new programming period 2021-2027.

# Drafting a strategy

- An example structure has been proposed - but it can be approached flexibly
- The focus is on innovation ('smart'): what is new / innovative, what is planned to be done to implement innovative approaches? What is smart for the village?
- Involvement of target groups: It is very important to involve the local community and partners in the development of the strategy. Special attention is paid on that.
- Action and funding plan
