

Group 1:
Capacity-building for Smart Villages
(LEADER & networking)

New information/ most interesting aspect of presented cases

- Estonian Smart Villages Network is within LEADER Union but collaborating with the NRN
- Smart Village strategies not directly linked to LEADER but villages can apply for support from LEADER to develop strategies
- The innovation camp needs animation support (e.g. from NRN) – hard to organise by the villages on their own

What is needed (*if discussed*)

- Clarifying the links with LEADER is important, especially how villages that are not directly linked to LEADER can get support
- Other types of capacity building, especially in digital skills is important (e.g. happening in Germany)
- European-level innovation camp
- Building local innovation ecosystems with participants from different sectors
