Comments: It

is right that it develops and that as many people as possible stay. I want more connection between people.

We think it just won't be anything if it is.

Because we are planning our future here.

We intend to move out.

There is a lack of a canteen here, not all houses are connected to the water supply.

To give young people a better future.

To keep young people at home and have more jobs.

We were born here and we don't care, we want our children to stay here. I want it to evolve so that young people stay.

To improve living standards.

Because it has potential.

Because we're going to grow old here.

Here we have an estate and children living on the Plateau.

That the quality of life will remain for future generations and the plateau will remain alive and prosper.

Creating better living conditions, jobs.

Because I think she fell asleep.

The road connection is not suitable for today.

I think young people are interested in developing the plateau.

What matters is how we live, infrastructure, services, events, socializing, jobs.

Because the development of the plateau affects the quality of life of my

family. If we reconnected, the future could be bright. There are too few offers and events, too many young people are leaving us.

Too little is being done for the plateau. The plateau is suitable for boutique development.

We see the future here. Because I want to live in a healthy environment and in coexistence with other planters.

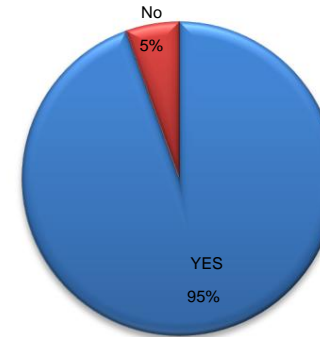

Underused opportunities. Because the world stands on young people.

The inhabitants of the plateau know best what is best for us and what we need.

To become more recognizable in all areas. If life were of better quality, the population would increase.

I don't want too many tourists. For a better stay.

Do you think about the development of Šentviška Gora

Comments:

Because there is too little style among the locals.

Something needs to be done.

Because I live here, the future of the plateau is important to me.

I am for cooperation when necessary.

Of course I have the option if I wanted to.

There is no connection between decision makers and paradise. There is no listening to the needs of the locals.

We have a chance, but for now we leave it to others.

Everyone can influence, they just have to get involved.

People have a hard time adapting to change.

The more that happens here, the more likely young people are to stay.

Decisions should be made by the young, the older we can support them.

There is a lot that can be done with hard work and good will.

Every individual can contribute to a better tomorrow.

We only partially agree that we have the opportunity, and we completely agree with the wish.

The transfer of ideas to the authorities (municipalities) is possible only through interconnection - the individual is usually powerless. It is a wish and I hope that it will also be an opportunity to cooperate and help to the best of our ability.

It takes a lot of effort and the effects are small.

The opinion of the elderly does not affect much.

We are not informed enough, so we do not have the opportunity to influence decisions.

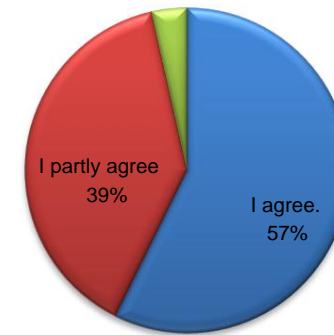

The main word is not up to me.

I do not see the possibility of influence.

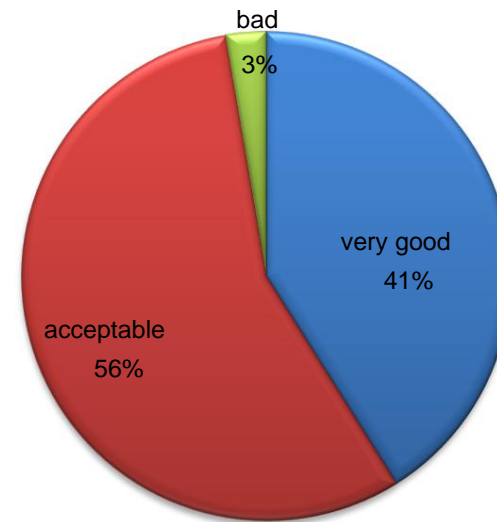

By working in KS and PGD we try to improve our lives and help each other.

Because we are still young and it seems to me that we could have more say in what is happening in our place.

I have the wish and opportunity to influence the future development I disagree. 4%

The quality of life here is:

Comments:

Nothing is taken care of except garbage collection.

After the base is still needed in the valley.

The supply of basic food for the elderly and transportation to the valley are lacking.

Because I'm healthy and the kids bring me everything I need.

I really like it here and people are happy to help me if I need to.

There is peace on the plateau, we get along well with the villagers.

I think just being away from the city is the biggest plus.

Poor infrastructure.

Living in peace and nature.

Some services are more accessible in larger places.

There is no shop, inn, internet connection is poor. For the elderly, the quality is poor. Kindergarten and school do not follow the schedule of parents working in the valley.

Those who visit the plateau, ask for catering, the right way and the like.

Poor drinking water

For every thing one has to go to the valley, good thing at least the school stayed.

There are many young families, but there is a lack of services and crafts (trade, catering, hairdresser, care for the elderly, mechanical workshop, ())

Distance is a big problem because it is necessary to go to Tolmin, sometimes several times a day. Whether certain things could be brought from the valley up, I often wonder.

By cooperating and connecting all the planters, the quality of living on the plateau can be even better.

Water pressure is poor.

Telecommunications are late - optics. Roads take us away from the centers - (in winter plowing at 10 am does not help).

There is a lack of a small grocery store.

More could be done for youth housing. Faster response from the municipality No shops, ATMs, and social space.

Life in the villages will become more and more appreciated.

A public passenger connection with the valley is needed, communal infrastructure, the housing stock is empty or sale for weekends, which is unacceptable, too many departures of the elderly to a retirement home.

Because we are far from the centers and because there is peace.

Because there are good people here.

It takes a lot more personal engagement than in the centers.

Road connections are poor.

It doesn't come by itself. It is necessary to work, invest, sometimes take risks, and above all, be positive and not moan.

Low pension. Life

here is good, we have a lot of good people, which affects the relationships that are good.

She is very good for peace.

Bad because there are more and more tourists.

Except for home-grown vegetables, everything has to be bought in the valley, the store is missing.

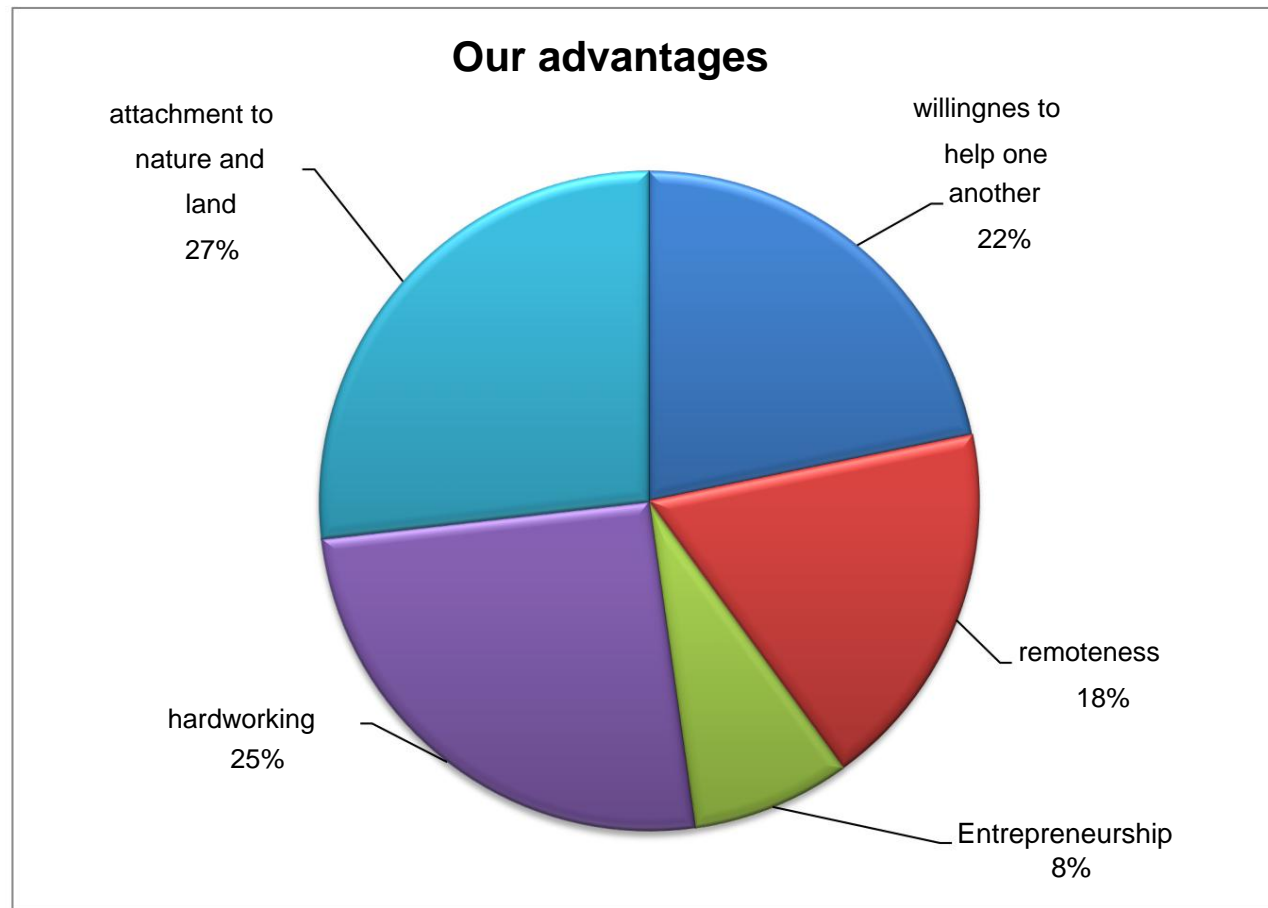

Accessibility to Tolmin (satisfactory road), missing local food offer - market.

Long distance from the kindergarten on Šentviška Gora.

As far as natural resources are concerned, the quality is excellent. Missing upgrade.

We miss the store, the bank, the PPT,...

A good inn is missing.

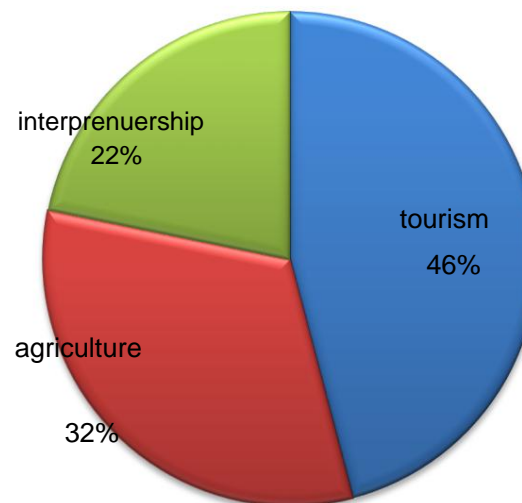

Other:

- Peasant wit
- active societies
- cultural sightseeing
- sports activities
- pure nature, the absence of industry, not mass tourism, opportunities for active leisure

Ingenuity

I want to increase the "visibilty" of Šentvišk plateau in:

Other:

Nature, hospitality.

Sporting events, concerts

Fashion, quality of life Tourism

and agriculture to a limited, controlled extent to preserve the primacy of the environment.

Awakening of old crafts.

Limited visibility is needed with regard to tourism.

Tourism in boutique form.

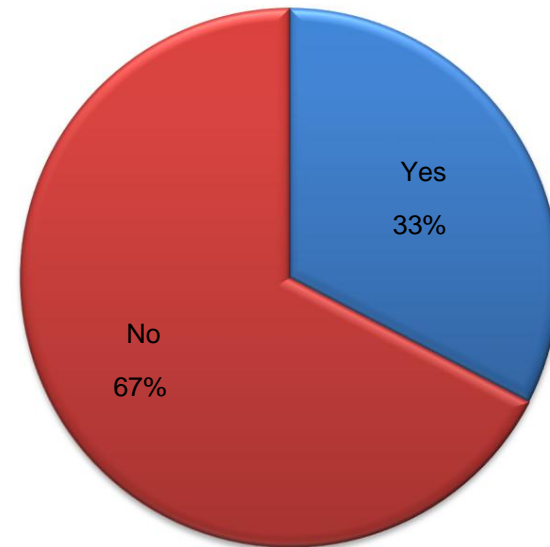

I don't know if we want to increase visibility because we have a beloved peace here.

Sport in general.

What are the motives for the decision?

- They have no place to stay here.
- Childcare problems, distance from work.
- Due to obtaining a building permit.
- Too far from work, there is no opportunity for young people.
- Lack of real estate for young people.
- The family did not receive housing.
- They wanted to buy an old house, but they were not given permission. Life on the Plateau is significantly more expensive than near the centers, due to daily migrations.
- Residential.
- Education and later service elsewhere.
- No housing, services...
- Quality of life. The plateau is a sleeping settlement.
- Almost the same conditions of new construction as in the valley.
- Excessive waiting times for building plots.
- The family was unable to find a building plot.
- Old empty houses are not for sale.
- Paperwork, the response of the municipality is too slow.
- Too far from work.
- Distance from jobs, infrastructure...
- Buying a house would be too expensive.
- Jobs with higher education - there are none.
- There are no building plots and the owners do not sell empty / abandoned houses.
- Slurry pollution.

Do you know anyone that would like to live here but he couldnt, because....

Comments

What will be, will be.

I already have a living space. Time will bring its own. If this house comes to life, we will benefit. If no one can have me at home, I will have to go home.

Preferably at home.

Living on the Plateau.

I have a planned community and space.

I support the idea of a retirement home in Peşine.

No, because we are still young.

To the point of helplessness at home, then to home.

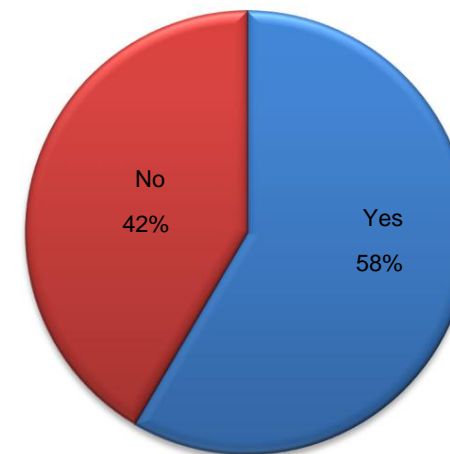

In Hawaii.

A good idea, if done well, the center will be received.

Preferred sheltered apartment.

Also in a sheltered apartment or intergenerational space.

Do you think how/where would you like to spend your old age?

Comments: I

am a more solitary type.

At least we could be somewhere.

For socializing and protection.

To be able to spend as much time in the home environment as possible.

So we don't get bored at home.

Maybe.

To be a home in Pejine.

Everyone probably wants to stay home and have company at the same time.

Desiring to benefit only leisure activities.

Together with acquaintances, socializing, cheaper and more affordable.

I see the privilege in the center as an opportunity to stay in famous places among our own for as long as possible.

Too good to be true. :)

Good idea to start with. In the following, urgent comprehensive care - a home for the elderly.

To be a lesser burden to posterity, and for the sake of socializing. If they were connected in a community.

This form of center offers benefits for the elderly as well as the young.

At least a few hours a day so that young people can go to work or work on homesteads in peace.

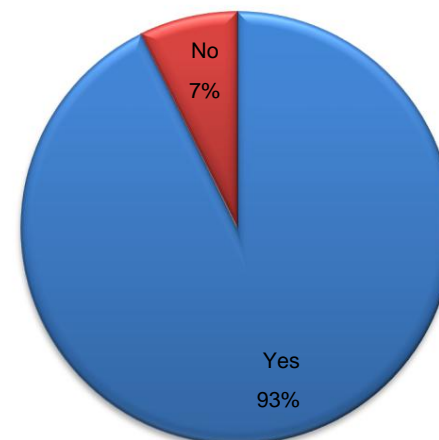

A space with such content would definitely positively attract people.

I think the idea is very good, especially in terms of coexistence and the transfer of knowledge between generations.

In the form in which it is written that.

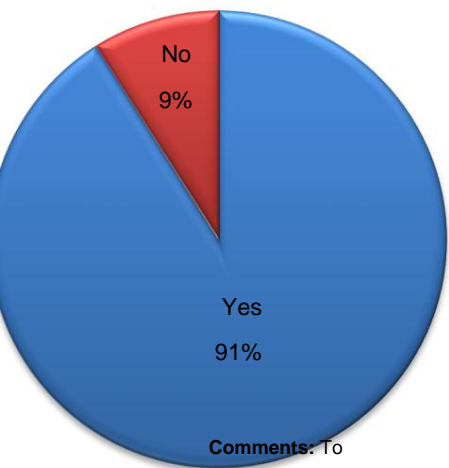

To allow transportation to the center.

Would you like to spend your old age in a form that the center would offer?

I would love to, even with accommodations.

operate at the workshops and rent activities in the center

Comments: To

make time pass faster. I

want country dance classes.

Depending on health.

Physical and mental activity is very important in adulthood.

Workshops should also be business-oriented for nature-friendly tourism, agricultural production, sales, promotion of local products... If

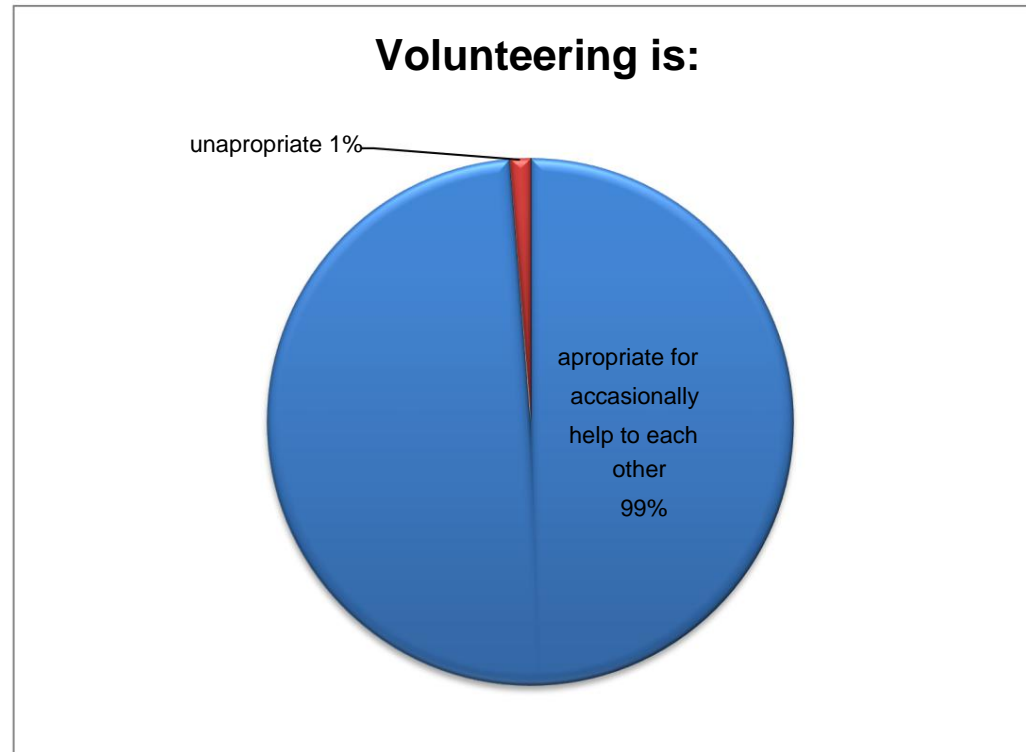

there is health. The problem will be who will bring in someone who can't drive.

Knowledge transfer is always welcome.

Exercise, handicrafts, reading books, growing flowers...

Lacemaking, knitting, handicrafts...

What we know can be passed on to the younger ones.

Comments:

We have always been volunteers.

It's a part of life.

Wherever you participate, you can learn something new.

Occasionally.

I would love to help with home farm chores.

Volunteering seems very important to us. If people are willing to come together, a lot can be done.

Basic help through volunteering, professional help is paid.

Just occasional, otherwise it won't be enough.

Volunteers alone will not be enough to run the center.

Volunteering is very good, but for higher goals it is necessary to find money, ideas,...

Just as an aid.

Volunteering is great, but unfortunately they are always the same.

Services would be cheaper this way. With a little effort and investment, you can help a lot.

Double satisfaction - the one who offers help and the one who receives it Up to twice a month.

Great.

Without volunteering, the idea is doomed to failure, as it will not be possible to provide funding for staff from the municipal budget or by applying for tenders.

They always helped each other in the village.

Volunteering is the law!

So at least some will move in the development of the plateau.

Socializing.

They will be hard to come by for a long time.

All to one extent.

Who still today, what he does voluntarily.

All put on a commercial basis, such a center does not hold.

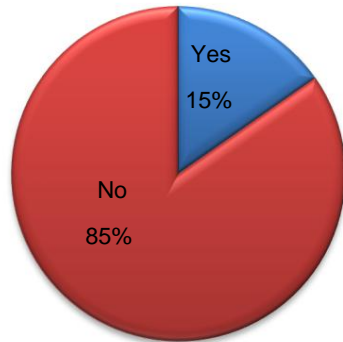

Professional help will also be needed.

For more sustainable care for the elderly, it seems to me that volunteering is not a sustainable system.

We believe that a professional approach is needed.

Yes, because it is affordable.

Do you have a need for childcare during vacations?

Comments:

Not to be in the valley

We are insufficiently informed about who on the plateau can and is willing to help a child.

This should be done by a school or kindergarten.

I help the children with their school work and drive them to various clubs.

Whatever was on the plateau would not have to drive children into the valley.

More than protection, workshops for children, quality leisure time with the acquisition of new knowledge and intergenerational cooperation are needed.

I believe that for many parents such help would be very welcome.

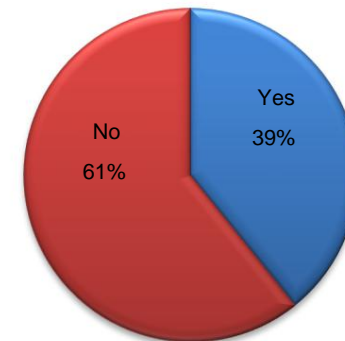

I have grandchildren.

Help would also come in handy for students.

Overworked parents.

Too often, children are left to fend for themselves.

Help with school work would come in handy

What would you add?

In order for children to learn from their elders as well.

Very good idea, everyone likes to spend as much time as possible. I

want the space to serve its purpose as soon as possible.

It will be nice if we can be users of our house.

As part of the info point for tourism, you could add a store with basic food and technical products.

It's high time that the building was given to its purpose - the people.

Swimming pool.

The center should be in the form of a public-private partnership.

You will have to be lucky in choosing the content to keep the center alive.

Possibility of eating at home.

A building that would otherwise collapse will be in use. The planters would be even more connected.

That would make sense in a larger place where you have nothing to do but work. There are plenty of these opportunities in the country.

Definitely a good idea. After the analysis, you will be able to judge what the interest is. Of course, an individual approach to potential users who are still hesitant is also important.

Perhaps the center could also be involved in the implementation of CŠOD activities.

Adaptation of the facility to make it suitable for residents of a retirement home.

I fear the idea is unrealistic, though urgently needed.

To make this happen as soon as

possible. If enough seniors are found to benefit from the offer.

It makes sense to check the interest, the needs of the people beforehand. If the idea comes to fruition, it will be a very big gain for Planota. We hope your efforts will not be in vain.

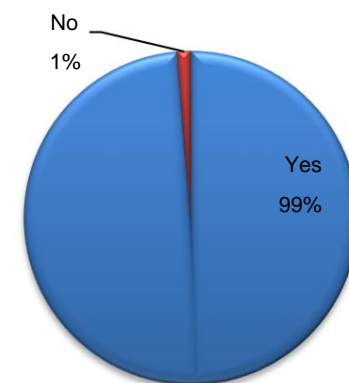

We support. In remote places, the need for such services is even greater and more desirable.

Good idea, boldly set goals. The Šentviš plateau needs "Our house"!

Encourage young people to study in the directions that the center would need.

It's important to finally do something with that facility. Top idea. There is a lack of catering on the plateau.

Do you think the idea of a center makes sense?

Definitely the location in Pejine offers all the conditions for the center. Consequences - greater connectivity and a better quality of life for the entire population. We are thrilled.

For the development of entrepreneurship, we could contribute space to start small businesses.

Above all, accommodation and catering must be provided, as there are more and more visitors.

There are more and more elderly people on the plateau who would need care in the form of a day center.

It would be good to use the workshops to connect children and the elderly. With games, the older ones would train their skills and the younger ones would develop empathy.

Together we could revive some old customs, holidays, .. And give meaning to birthdays, the week of the elderly, mobility,...

We could add a maternity home.

Arrange the space of the service activity - hairdresser, seamstress,...

In the center, we find the most sensible day care for the elderly, an info point and a common point for marketing local products.

(Tourists ask about them).

I wish success and perseverance to all those who have embarked on this project, because we all want this common center to live on.

A catering offer is essential. Awaken the May Day parade, the vigil.

The idea is development-oriented, welcome, as it solves areas on the plateau that are poorly developed (care for the elderly, entrepreneurship, tourism, complementary activities on farms...)

At the moment, a center with suitable diet menus would suit me very well.

I am pleased that something is going to benefit everyone.

There is a need for such a center everywhere, because we all need company and help.

If we want to develop tourism, nutrition is essential.

We would need optics, a good restaurant, more events for young people and children.

The facility would be more suitable for any offer for tourists (eg restaurant).

Transport for the elderly, shop, snack bar.

Maybe workshops should be held from time to time in Ponikve.

I support the idea, also suitable for mutual cooperation of associations, I support the idea of a hostel.

It could also be a gym.

Fix improve infrastructure, optics / roads.

Great idea, we need that on the Plateau.

Organization of transport for the elderly.

In order for home help to be organized within the center.

To open the center as soon as possible.

The possibility of a public-private partnership should be sought in the functioning.

Local products store + mixed goods. Or the option of ordering to be brought in the next day.

Kudos to the one who initiated the idea.

The implementation of the idea is necessary for a better future on the Plateau.

GENERAL COMMENTS:

What is good for everyone is always welcome. Let the idea be realized as soon as possible.

It's okay to get an older place to hang out.

We miss more connectivity.

Increase game shooting. I

want this to happen and not just stay on paper.

It would be good to have a permanent activity that would also offer some kind of employment. The needs are after a warm meal, for those living alone.

Let it go in the right direction.

For the elderly population, the idea is good. It is necessary to attract young people in order to improve the quality of their stay.

Roadside waste problem - still a huge amount of cans.

The idea of the center is very good. Care for the elderly and the provision of housing, including for young people, are needed.

However, we are firmly against tourism that brings nothing - apartments.

Certain hamlets of Planota are demographically endangered. Explore and try to do something. All projects are for people, if there aren't, they don't make sense. I hope the project succeeds.

Kudos to the initiators of this project.

Kudos to the team - also for the possibility of involving other planners in the selection of ideas, suggestions and opinions.

Services set up and funded to help and support citizens should be shown where to go on the plateau. Not all citizens are proficient in the Internet, Support for the development of rural tourism with the possibility of selling local products.

The idea is commendable, we want it to succeed and come to life, we are also ready to help.

The distance from the jobs is a big minus of the plateau. Maybe this will change with the development of homework (we need optics). In terms of jobs, Tolmin does not offer enough choice.

Here, agriculture is the first industry and will remain so. Tourism and the economy are essential for progress. Young people need to be allowed to build their own future. If they stay here, the elderly will also be taken care of.

Great idea - congratulations!

Holiday courses for children: scouts, scouts, oratory,... ČŠOD,... We want a lot of courage. Only in this way can ideas become reality!

I am very supportive of all the initiatives given and I thank and admire the whole team. I wish you successful work.

Asphalting the road to Tivnk as soon as possible - increased cycling tourist offer. More events in the hall.

More maintenance of forest trails.

Cooperation with the Tolmin Retirement Home, in the form of a day center, which would also offer occasional health services.

Our primary agricultural produce, meat and milk, should be processed here and pick up added value.

Maintenance of existing projects - playground, playground.

The desire to realize an idea as soon as possible.

The building would come to life, new jobs, the supply of the old ones.

Praise for the idea and for the energy to the locals. To contract with service providers: hairdresser, pedicurist, occupational therapist, masseur,...

To have some kind of inn or farm tourism on the Planota, to stop and eat something.

The center should also provide home help, advice to relatives on patient care, regarding possible aids - use and purchase.

Somewhere on the Plateau it is necessary to offer offices to start a start-up company for young people. Once the company has grown, the space is left to the next. Rent is minimal or free.

It's already happening, more cyclists, more tourists, more trash along the way. Are there many unemployed people on the plateau - no - so working towards making people live off tourism makes no sense. One tourist farm would be enough to support a family.

To be able to exchange or sell surplus crops to each other.

What about the Metalflex building?

In any case, any idea is better than the object failing.
